

1st Year Metal Fabrication Apprentice

Ascot Welding

Ascot Welding are currently looking for a 1st year engineering (metal fabrication) apprentice to join the team.

Working with qualified and skilled welders you will gain valuable hands on experience, mentoring and support.

Duties will involve:

- Performing engineering measurements
- Apply welding principles
- Use workshop machines for basic operations
- Carry out mechanical cutting
- Apply principles of occupational health and safety in the work environment

The successful candidate will:

- Be a confident communicator
- Be able to undertake manual/physical work
- Motivated with a genuine interest in the fabrication industry
- Be trustworthy and reliable
- Have a high level of attention to detail

Suitable applicants must have a genuine interest in pursuing fabrication as a career path, be motivated and willing to work hard to get trade qualified.

The successful candidate will undergo Certificate III in Engineering.

Recent school leavers are encouraged to apply for this position.

To be eligible for an apprenticeship or traineeship you must be an Australian Citizen, Permanent Resident or have full working rights.
